# 4<sup>th</sup> National Symposium on Clinical Research Methodology & Medical Writing - 2019

**Theme:**

**“Clinical Research - an integral part of Clinical Practice”**

“Shanmuga Medical Research Foundation Trust” in association with “Dr. Tiru's Clinic'les Pvt. Ltd.” cordially invites you to a **4<sup>th</sup> National Symposium on Clinical Research Methodology & Medical Writing**. Symposium focuses on inculcating and integrating “Clinical Research, a part of your Clinical Practice in a smarter way”. Clinical Research need not be thought as a secluded area of focus; rather it can be practiced and adhered in to your own clinical acumen.

“Evidence Based Medicine” is just remaining buzz word and we hope these series of symposiums would be a trend setter in this part of our Nation. We invite delegates only with a *niche* interest for clinical research.

Faculty for this symposium needs no introduction as their names always features in many international conferences. We only request all delegates free from “Mobile phone disturbances” so that atmosphere in the conference hall remains highly receptive.

**Members of teaching institutions and Post-Graduate (PG) students who are scripting their thesis works would be highly benefited.** This platform would enable the doctors to set-up their Ethics committee in their institutions - be it a teaching institution or a corporate hospital / private health care facility.

No doubt, clinical research is going to flourish in this decade and doctors with more publications would be easily recognized by even the general public as in western part of the world.

**“Publish or Perish” - it may sooner become a reality**

**Dr. S.R. Tiruvalavan**
